

PROFESSIONAL EDITION

THE EASIEST CRM SOFTWARE FOR OUTLOOK®

The Prophet 5 Professional Edition transforms your Outlook into a powerful contact and sales management system for your business. It provides you with advanced tools to be better organized, more efficient, and more successful. Continue using Outlook's e-mail, calendar, contact, and task features while adding contact management, sales opportunity tracking, reporting and information sharing. Prophet 5 Professional is the perfect system for small and medium size businesses.

PROPHET CONTACT MANAGER

PROPHET 5 PROFESSIONAL SERVER EDITION

The Prophet 5 Professional Server Edition provides a centralized, secure database of all contact and sales information for your entire team.

Working in association with the Prophet 5 Professional Client it provides the perfect solution for Outlook based sales organizations. With the Prophet Professional Server System you can:

- **Share sales data:** Each team member can manage their own Opportunities while sharing data such as the contact and company information, who is managing the sale, the value of the sale, and all related notes.
- **Share Client Communication:** Any e-mails, Appointments or Tasks linked to an Opportunity (not your personal items) can be reviewed by other team members. (Requires Exchange Server)
- **Review and Manage Sales Activity:** Any member of Management can review and update the sales Opportunities for an individual rep or the entire team in real time.
- **Create Comprehensive Reports:** Standard Pipeline, Forecast, and Summary Reports can be easily created for a single rep or for the entire team. Create your own custom reports and share the template across your group.
- **Work Remotely or Off-line:** Access your own Prophet data via Windows Roaming Profile, Terminal Server, or VPN or simply work off-line and Prophet 5 will save everything and synchronize to your Prophet Server when you return to the office network.

PROPHET 5 PROFESSIONAL CLIENT

The Prophet 5 Professional Client is the user edition that integrates with your Outlook to provide contact and sales management features such as:

- Viewing the total dollar value of opportunities at each stage in your pipeline, and the revenue estimated to close in the next 30, 60, or 90 days.
- Viewing accounts by contact or company, and see all opportunities associated with them.
- Creating automated e-mail and follow up campaigns and assign them to any group of contacts.
- Importing sales opportunities from other sales and contact management software programs.
- Customizing the view of your sales pipeline by selecting the specific columns you want to see in Opportunity Manager.
- Working in association with the Prophet Professional Server Edition, you can share your contact and sales data with a team of up to 50 people.

If you currently use Office 2000, XP, 2003 or 2007 with Outlook and you need to increase your sales or manage your sales team more efficiently, Prophet 5 Professional is the solution for you and your business. You can find more information, tutorials and tips at www.avidian.com.
