

PROPHET

CRM OnDemand

Easier Quicker CRM for Outlook

Prophet OnDemand just made Prophet, the easy CRM for Outlook, even easier. Prophet works the way you work, all inside of Outlook. There is no need to run two applications, two contact databases or two calendars. With Prophet OnDemand, we simplify your life by adding the sales features that you want all inside of Outlook. Contact us to learn more and get started on being more Profitable with Prophet.

KEY BENEFITS

Easy Contact Management in Outlook

With Prophet OnDemand you can easily create, manage and share contacts and sale information with your team. Prophet turns Outlook into an easy, centralize and secure contact and sales management system.

Up and Running Quickly

You can be up and running in hours instead of months compared with other CRM apps. Our Client Services team will also walk you through our best practices for setup, configurations and customizations. Live instructor lead training is also included in your setup fee.

Lower Upfront Costs

In addition to getting start quicker, it costs a lot less money to get started on Prophet OnDemand. Prophet OnDemand requires no additional server hardware, server software or added IT infrastructure to get started.

Safe and Secure Data

You can have peace of mind that your important sales and customer data is safe, secure and available to you whenever you need it. Prophet OnDemand is hosted in a world class data center with redundant power, internet connections, and daily backups.

Automatic Updates

With Prophet OnDemand, you will always run the latest version of Prophet. Prophet is automatically updated to include any new feature releases and updates.

Same Features as Prophet Enterprise

Prophet OnDemand has all of the same features as Prophet Enterprise, with the exception that all of your sales data is safely and securely hosted on our world class data center. All of your server configuration is performed through a secure website. You don't need to have your own backroom server.

KEY FEATURES

Centralize Contact and Sales Management in Outlook

Do all of your customer contact and sales management inside of Outlook. Being inside of Outlook, ensures that your CRM investment gets used and helps your business.

Segment Your Data By Group

Establish groups and permissions so team members can share information with each other, but each team remains a separate group.

Create User Permissions

Establish a hierarchy so each Manager can see the data for the teams they supervise, while Executives can see an overall view of the whole company.

Share E-mails, Calendars or Tasks

Any e-mails, Appointments or Tasks linked to an Opportunity can be shared with members of your team. Your personal e-mails still remain private. (Exchange Public Folders Required.)

Provide Management Review

Managers can review, in real time, the sales pipeline for an individual rep or for their whole team. Executives can review for a rep, a team, or the company overall.

Create Management Reports

With the Advanced Report Engine create over 40 standard reports such as Sales Forecasts, or Call Reports for a rep, a team, or the company. Design your own custom reports and share them with team members.

Works for Small or Large Sales Teams

Prophet OnDemand can support 2 or more than 1,000 users.

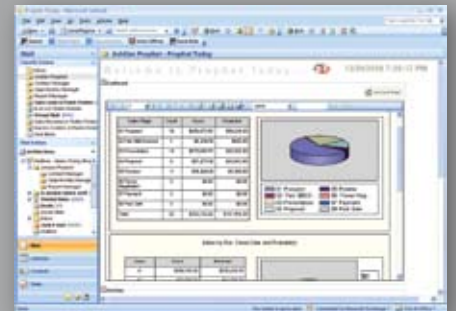

Automatic Workflow

Create a consistent sales process with Prophet's workflow so that you can count on sales processes you create are followed.

Quote Generator

Automatically create professional looking quotes right from an opportunity to save time and know what you are selling.
